DEPREDATION PREVENTION HUNTING SEASON APPLICATION

There may be special hunting seasons for big game animals causing damage to land, growing cultivated crops, stored crops, seed crops, improvements or causing extraordinary damage to grass. There may be special hunting seasons for trophy game animals causing damage to livestock, bees and/or honey and hives.

Application shall be made to the Game and Fish Regional Office where participation is desired. Applicants must apply annually beginning July 15 to be included on priority lists. Applications must be received by 5:00 p.m. October 31. Applicants must make separate application for each species they desire to hunt. Priority lists shall remain in effect for a twelve (12) month period beginning November 1.

Name placement on each depredation list may be established by first come-first served if the number of applicants do not exceed the number of licenses to be issued; otherwise, name placement shall be determined by random selection. In emergency situations, as determined by the Regional Wildlife Supervisor, a first come-first served basis of hunter selection shall be used.

Any big or trophy game animal taken in a depredation hunt shall be in addition to the bag limit established by Commission regulations for the species taken, excluding moose, bighorn sheep, mountain goat, and/or grizzly bear. The bag limit for any individual participating in the depredation hunting seasons shall not exceed more than one big and/or trophy game animal of each species during any calendar year. **The maximum bag limit for elk in the same calendar year for any one hunter under General Hunting Regulations and Depredation Prevention Seasons shall not exceed two (2) elk.**

More detailed information is contained in Wyoming Game and Fish Commission Regulation Chapter 34, Depredation Prevention Hunting Seasons.
