

# TEST YOUR KNOWLEDGE

## Match the tracks to the animal

### Having trouble matching animals to their tracks?

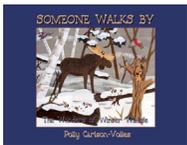

That's ok! It can be very tricky. Here are some hints to match these wildlife to their tracks:

- Beavers have webbed feet to help them swim better.
- Grizzly bears have really long claws- about 3 inches in real life!
- Coyote tracks look a lot like dog tracks, but are a little smaller.

- Deer have hooves.
- Squirrels have 4 toes on their front paws and 5 on their back paws.
- Raccoons have 5 toes on their front paws and 5 on their back paws.
