

Driving Directions: From Hoback Junction south of Jackson, go about 14 miles east on Highway 26 (or 5 1/2 miles from Bondurant) to where US Forest Service road 30530 takes off on the south side of the highway. The instream flow segment begins at the mouth of Little Cliff Creek that's about 2.3 miles south from the highway turnout and extends another 6.3 miles upstream (south) to the mouth of Snag Creek. The USFS road 30530 parallels the stream over the entire length but gets progressively poorer near the upper end.
