

Driving Directions: This segment runs the entire length of the WGFD Wick Brother's WHMA near Arlington. To reach the stream take I-80 about 5 miles west of Arlington and turn off at the DOT rest area exit. Just before entering the parking area, you'll see a sign noting the WHMA on your right that's next to a gravel road. Take this road that is actually a loop road, which means you can take either fork where it branches in about a half mile and cross the instream flow segment twice before winding up back at the fork. The entire road is passable by a passenger vehicle.
