

Driving Directions: South Piney Creek is easy to find and is accessible by good paved and gravel roads in all seasons except winter. To get there, take the Middle Piney Road (highway 350) west from the town of Big Piney. In about 10 miles turn left onto the Emmigrant Trail/Lander Cutoff Road. It's another 9 miles or so to the Forest Service boundary and the lower end of the instream flow segment. The road continues to parallel the stream for another two miles before breaking off, - but you can park and walk along the creek to fish the entire instream flow segment.
