

Driving Directions: Fish Creek is easy to find and is accessible by good paved and gravel roads in all seasons except winter. To get there, take the Middle Piney Road (highway 350) west from the town of Big Piney. In about 10 miles turn left onto the Emmigrant Trail/Lander Cutoff Road. It's another 9 miles or so to the national forest boundary. Go about two miles on west from the boundary to FS road 10046 (should be a sign at the fork) and turn right (north). Go about 4 miles on this road until it winds down a short distance and crosses over Fish Creek. You can fish up or downstream from the crossing but there are probably bigger fish in the 4-mile section of stream between the road and the end of the segment at the forest boundary.
