Driving Directions:
From La Barge, travel south on US 189 to La Barge Creek Rd (Co Rd 315). Travel west on La Barge Creek Rd for 14.5 miles and turn right on to a two-track road. Take the two-track for about 1/3 mile and park on the left side of the road. Hike down to the creek. A gabion structure built to block non-native fish passage serves as the downstream endpoint of the segment. This portion of the segment is on state-owned land. The segment extends upstream 2.73 miles from the gabion structure on to BLM land and to the upper extent of the Colorado River Cutthroat Trout population. The segment is entirely on BLM land and state land.
