Driving Directions:
Travel northwest on highway 26 W/287 N from Dubois to the USFS boundary and then continue about 2.5 miles until reaching Forest Road 532 (Warm Springs Creek Road) on the left (you’ve gone too far if you reach the Tie Hack Memorial on the left hand side of the road). Travel down FR 532 about one mile to the bridge over Sheridan Creek. The bridge is about one mile upstream of the segment’s downstream endpoint, which is at the boundary between USFS land and private property at the east line of the SWNW Quarter of Township 42N, Range 109W, Section 2. The segment extends upstream 6.85 miles to the upper extent of the Yellowstone Cutthroat Trout population. The segment is entirely on USFS land.
