Driving Directions:
From Big Piney travel south on US 189 to Wyoming 235 and turn right (west). Travel about 10.8 miles to BLM road 5328 on the right. Take that road about 4 miles to BLM road 5327 on the right. After about 3.5 miles take the two-track road off to the right (sharp right turn) that leads down to the creek (the creek that you cross just before reaching Trail Ridge is Beaver Creek, which lies on private land). The downstream endpoint of the segment is about ¼ mile downstream at the boundary of BLM land and private property at the east line of the SWSW Quarter of Township 29N, Range 14W, Section 24. From that boundary, the segment extends upstream 4.23 miles to the upper extent of the Colorado River Cutthroat Trout population. The segment is entirely on BLM land.
