☐ Yes

☐ No *(Go to end of survey)*

☐ Don't know *(Go to end of survey)*

- Q8** How many different days did you hunt Deer on AccessYes Walk-in Areas or Hunter Management Areas during the 2017 season? *(Note: Count each partial day of hunting as 1 day of Deer hunting) (Enter number in space below; if no days, write 0)*

Note: Harvest estimates for limited quota licenses allowing antlered harvests are based off antlered harvests only while estimates for limited quota licenses allowing only antlerless harvests are based off adult antlerless harvests only. Harvest estimates for general licenses are based off antlered harvest only. The statewide harvest totals shown in Table III include all harvests.

Note: License level confidence intervals are based on estimated total license success rates (harvests / number sold).

Note: Success 90% margin of error was less than  $\pm 10\%$  for 35 of 35 (100%) limited quota licenses where a non-census sample was taken. Success margin of error is not applicable (-) for the 47 limited quota licenses where all license holders were sampled (those limited quota license types with 50 or less licenses available, or where all license holders needed to be sampled to achieve the target number of usable survey responses). The number of usable surveys was at least 26% of sales for all 40 deer general license strata.

Note: Harvest estimates for limited quota licenses allowing antlered harvests are based off antlered harvests only while estimates for limited quota licenses allowing only antlerless harvests are based off adult antlerless harvests only. Harvest estimates for general licenses are based off antlered harvest only. The statewide harvest totals shown in Table V include all harvests.

Note: License level confidence intervals are based on estimated total license success rates (harvests / number sold).

Note: Success 90% margin of error was less than ±10% for 70 of 70 (100%) limited quota licenses where a non-census sample was taken. Success margin of error is not applicable (-) for the 135 limited quota licenses where all license holders were sampled (those limited quota license types with 50 or less licenses available, or where all license holders needed to be sampled to achieve the target number of usable survey responses). The number of usable surveys was at least 26% of sales for all 40 deer general license strata.
