

Attention Anglers

Fisheries managers from WGFD and UDWR are concerned with an increasing number of small Lake Trout (< 28 inches) in Flaming Gorge Reservoir.

=

Anglers can help by harvesting Lake Trout less than 28 inches.

Harvesting smaller Lake Trout leaves the remaining fish with more food to sustain higher growth rates and trophy quality.

You can also find more information about Lake Trout in Flaming Gorge Reservoir along with tips for how to catch small Lake Trout and recipes at the following link.
