Comments: Bill prominent, dark; head feathered; upperparts black; underparts black appearance; wings underside whitish; tail underside whitish.

Vote Comments: The description provided could have fit other birds. For such a rarity in WY, more documentation is required. A better description of the tail would eliminate other similar species.

Comments: Bill fairly large, heavy, yellow cere, black tip; head robust; upper and underparts black to slate blue/black; under wings with great color contrast between flight feathers and forward part; under tail whitish, narrow banding, longish; lower legs yellow.

Vote Comments: Unable to separate the bird observed from the Harlan's Hawk or a dark phase Broad-winged Hawk. A photograph would be helpful.
