* Actual downloads exceed WG&F sales data.

Note: Harvest estimates for limited quota licenses allowing antlered harvests are based off antlered harvests only while estimates for limited quota licenses allowing only antlerless harvests are based off adult antlerless harvests only. Harvest estimates for general licenses are based off antlered harvest only. The statewide harvest totals shown in Table III include all harvests.

Note: License level confidence intervals are based on estimated total license success rates (harvests / number sold).

Note: Success 90% margin of error was less than ±10% for 18 of 34 (53%) limited quota licenses where a non-census sample was taken. Success margin of error is not applicable (-) for the 30 limited quota licenses where all license holders were sampled (those limited quota license types with 50 or less licenses available, or where all license holders needed to be sampled to achieve the target number of usable survey responses). The number of usable surveys was at least 26% of sales for 5 of the 41 deer general license strata.

* Actual downloads exceed WG&F sales data.

Note: Harvest estimates for limited quota licenses allowing antlered harvests are based off antlered harvests only while estimates for limited quota licenses allowing only antlerless harvests are based off adult antlerless harvests only. Harvest estimates for general licenses are based off antlered harvest only. The statewide harvest totals shown in Table VI include all harvests.

Note: License level confidence intervals are based on estimated total license success rates (harvests / number sold).

Note: Success 90% margin of error was less than or equal to $\pm 10\%$ for 42 of 63 (67%) limited quota licenses where a non-census sample was taken. Success margin of error is not applicable (-) for the 159 limited quota licenses where all license holders were sampled (those limited quota license types with 50 or less licenses available, or where all license holders needed to be sampled to achieve the target number of usable survey responses). The number of usable surveys was at least 26% of sales for 5 of 41 deer general license strata.
