Deer, Moose, Elk & Caribou by Deborah Hodge

Did you know that less than a week after it is born a baby deer can run faster than a human? Or that in a day, a moose eats as many as 90 big salad bowls of greens? Simple straightforward text and realistic detailed illustrations explain where and how deer live, how they give birth, what they eat, anatomy and much more.

Someone Walks By by Polly Carlson-Voiles

Someone is walking through the north woods in winter. Readers can see the tracks in each detailed depiction of winter habitat, but they don't discover the mystery animal until the last pages. On the way, they see frozen wood frogs, a bear in her den with her newborn cubs, sleepy chipmunks and many other creatures surviving and even thriving in the cold, snowy winter environment.
