"GeoPDF" Maps
General Use Information

Plan Your Hunt Mapping Application
What is a Geospatial PDF (GeoPDF)?

A geospatial PDF is a special version of Adobe's Portable Document Format that relates a region on a map to its real-world coordinates via georeferencing. You can utilize this technology on your Windows, Apple, or Android mobile device. This will allow you to navigate a map (GeoPDF) using your GPS enabled device. Once the map is on your device, no internet connection is needed. Your location is determined using satellites, not cellular towers. Avenza PDF Maps, a common GeoPDF reader, is available for download on Windows, Android, and iPhones.

Install the App to your Device

Please download and install Avenza PDF Maps from the app store on your Windows, Android, or Apple device.

Once downloaded, there is a sample map in the application called "Getting Started" that you can use to get a feel for using the app.

** These maps are for visual use, assistance and general location only, do not represent a survey, and are not to be used for legal conveyance. Area boundaries are approximate, consult Game and Fish Regulations for descriptions and restrictions.

How to Access a GeoPDF on our Website

You will notice an icon above our interactive maps on certain pages of the website. By clicking directly on the icon, the GeoPDF map will open in your browser.

Plan Your Hunt Mapping Application
Open and Save the GeoPDF

The map will include the following:
- **Boundaries**
- **Map Legend**
- **North Arrow**
- **Scalebar**
- **Area Map**
- **Basemap**
- **Species Info**
- **and more...**

Once the GeoPDF is open, you need to save it locally to your computer. Depending on which internet browser you are using will depend on where the "Save" button is located. The images above display the location of the "Save" button on Google Chrome and Internet Explorer.

** These maps are for visual use, assistance and general location only, do not represent a survey, and are not to be used for legal conveyance. Area boundaries are approximate, consult Game and Fish Regulations for descriptions and restrictions.

Get GeoPDF to Mobile Device

You can use email (an account setup on your mobile device), Dropbox, etc... to transfer to file to your mobile device.

Email: To utilize your email, you must have an email account setup on your mobile device. If you do and after you download the GeoPDF to your local computer, send an email to the account that is setup on your device with the GeoPDF attached. Then open that newly sent email on your email application within your mobile device.

Dropbox: Dropbox allows you to access your files from anywhere, on any device. A standard account is free to create. Visit **Dropbox.com** to create your free account. Once you have created your account and logged in, you can upload the GeoPDF that you saved on your local computer to your Dropbox account.

## *Add the GeoPDF to Avenza PDF Maps Application on your Mobile Device*

Once the PDF is saved to your mobile device, or you have it uploaded to your Dropbox, open Avenza PDF Maps.
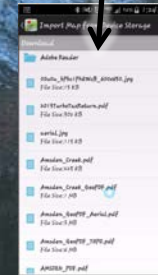

2. Select "From Device Storage"

3. Select the appropriate GeoPDF Map

1. Click on the "+" sign

If using email

**4. After selected, it will process and appear in your list of maps.**

2. Select "From Device Storage"
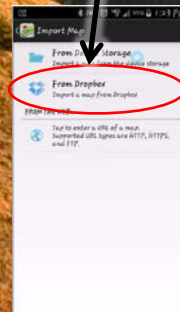

3. Select the GeoPDF from your DropBox Files

If using DropBox

** These maps are for visual use, assistance and general location only, do not represent a survey, and are not to be used for legal conveyance. Area boundaries are approximate, consult Game and Fish Regulations for descriptions and restrictions.

Open the Map in Avenza PDF Maps

*Your GPS must be enabled on your device and you must physically be in the extent of the map to use locations services.

When your GPS is enabled and you are physically in the extent of the map, your location will be symbolized by a blue dot. As you navigate the terrain, your location (blue dot) will continue to move, always representing your current location.

Turn On/Off your GPS within the map

Add a placemark to the map
