This report was completed through a partnership with the Wyoming Game and Fish Department and the Wyoming Survey and Analysis Center at the University of Wyoming. As always, we are indebted to the many sportspeople who completed a survey questionnaire and shared valuable information about their hunting experience.

Executive Summary

Each year the Wyoming Game and Fish Department surveys moose hunters to estimate harvest, hunter success, and hunter effort. This information helps the Game and Fish manage moose populations and plan next year's hunting seasons. The harvest statistics presented in this report were estimated based on 280 responses to a voluntary harvest survey sent to 368 license holders and extrapolated to represent 368 moose hunting licenses issued. We estimate that 338 moose were harvested in Wyoming during the 2025 hunting season.
